

SEEPAGE PIT PERMIT APPLICATION

1. Contractor: _____ Phone #: _____ FAX #: _____

Address: _____

2. LOCATION/ADDRESS OF IMPROVEMENT (all information is required):

Owner: _____ Subdivision: _____ Map/Parcel: _____

Street: _____ City: _____, PA _____

3. Dwelling Roof Footprint Area: _____ ft.² Accessory Structure Roof Footprint Area: _____ ft.²

4. Applicant's Statement:

Applicant hereby makes application for a Seepage Permit under all applicable ordinances of Fawn Township, and hereby certifies under the penalties of perjury that all facts set forth herein are true and correct and the actual work will be performed in accordance with the above.

4. Applicant Signature: _____ Date: _____ Permit Fee: **\$100.00**

Print Applicant's Name: _____ Phone #: _____ FAX #: _____

Address: _____

SEEPAGE PIT PERMIT

1. Date Received: _____ 2. Zoning Officer Approval: _____ 3. Date Approved: _____

4. Inspector Name: Steve McKeon 5. Telephone No.: (717) 382-4915 6. Permit No.: _____

7. Pit Sizes: Principal Dwelling Pit Size -- Volume _____ ft³ x _____ ft. wide x _____ ft. long x _____ ft. deep

Accessory Structure Pit Size -- Volume _____ ft³ x _____ ft. wide x _____ ft. long x _____ ft. deep

Alternate Pit Size: Pit size and number may be adjusted to accommodate the soil conditions of the site.

8. Selecting Alternate Pit Size: **Note: Pit Volume must be proportional to the roof area drained to each pit!**

- a. To find a pit size take the footprint roof area that will drain to the pit and divide this area by 2 (roof area/2 = pit volume). This is the pit volume needed.
- b. From "Pit Size" table find the pit depth that accommodates your site conditions and read across to the volume that meets or exceeds the volume needed.
- c. For the pit depth and pit volume desired read up the volume column to the top of the table and get the pit length and width.

example: For a pit depth of 8'-6" and a needed volume of 1182 cubic feet, read across to 1183 cubic feet and up to pit size of 13'-0" wide x 14'-0" long.

Pit #1: Vol. _____ ft³, x _____ ft. wide x _____ ft. lg. x _____ ft. deep Pit #2: Vol. _____ ft³, x _____ ft. wide x _____ ft. lg. x _____ ft. deep

Pit #3: Vol. _____ ft³, x _____ ft. wide x _____ ft. lg. x _____ ft. deep Pit #4: Vol. _____ ft³, x _____ ft. wide x _____ ft. lg. x _____ ft. deep

9. Call Inspector: Call the inspector and confirm agreement to your proposed seepage pit alternate sizes.
